

Pierre Belon Savon

AI Engineer | Ocean Shores, WA | belonsavon@gmail.com | 360-660-2460 | github.com/belonsavon-sys | English, Spanish, Italian

PROFESSIONAL SUMMARY

AI Engineer with a proven track record of designing and deploying intelligent automation systems that eliminate operational inefficiency and produce measurable business outcomes. Experienced building full-stack applications, multi-agent AI harnesses, and process digitization tools, and putting them to work inside live business operations. Trilingual communicator with a background bridging hospitality operations, finance, and AI-driven product development.

EXPERIENCE

Blackdoor - Co-founder & President

Sept 2025 - Present | Remote

- Co-founded a holding company developing and operating agentic companies across entertainment, SaaS, robotics, and AI.
- Designed and built Atlas, a multi-level autonomous agent harness connecting subscription AI models, local models, API models, and any external tool via API, MCP, or OAuth.
- Atlas orchestrates a full company hierarchy: CEO agent to C-suite agents, manager agents, and field agents.
- Atlas has shipped a game app, a budget web app, and an agent-augmented project management system.
- Directing AI R&D across agent harness architecture, backend AI systems, and cloud and local deployment strategies.
- All development is governed through GitHub PR workflows, with full documentation and spec research completed before implementation sprints.
- Technologies: Claude, Codex, Perplexity, Antigravity, Cursor, VS Code, GitHub.
- Underlying technology reworked and deployed at an active hospitality business.

ThePrivateHotels (Soquiomere) - Hotel Operations Supervisor

Apr 2024 - Present | Ocean Shores, WA

- Progressed from Finance Data Entry Assistant and part-time Housekeeper to Housekeeping Supervisor and Hotel Operations Supervisor.
- Originally onboarded as a remote contractor from Italy, then recruited to relocate to Washington for full-time employment.
- Supervised a team of 6 and managed contractor relationships and scheduling.
- Oversaw operations across 1 active property while supporting the buildout of 3 additional properties and 2 event venues.
- Digitized a 100+ page property operations manual into a trackable, quantifiable digital inspection process.
- Built and deployed a guest communications chatbot trained on curated company data for human-reviewed replies in Smarttask.
- Cut response time from up to 48 hours to under 3 minutes, saving 15-20 minutes of drafting per message.
- Automated hotel workflows using Zapier, Guesty API, and Twilio API, replacing multi-hour manual coordination loops.
- Authored room-by-room SOPs, laundry procedures, and inspection checklists; trained 6 staff on systems, standards, and tools.
- Managed 100+ inventory items across linens, amenities, F&B, laundry supplies, and property equipment.
- Processed invoices, bills, and receipts in QuickBooks for roughly 6 months with zero errors on record.
- Contributed to Airbnb Guest Favorites top 10%, Booking.com Travelers' Choice Award, VRBO Premier Partner, and a consistent 5-star average.
- Attended leadership and manager-level meetings, prepared operational reports, and participated in a company leadership retreat in Hawaii.

INDEPENDENT PROJECTS

Workout App (End-to-end, personal)

- Built a fully functional personal workout tracking application from scratch, eliminating the need for paid subscription fitness apps.
- Stack: Next.js, React, Supabase, Vercel, built with Codex and Claude in VS Code and Antigravity.

Personal Budgeting App (End-to-end, personal)

- Developed a budgeting application with a built-in AI financial advisor that had full context of the user's financial data.
- Stack: Next.js, React, Supabase, Vercel, built with Codex and Claude.

Daily Market & News Automation (Personal)

- Built an automated daily pipeline: ChatGPT-powered web searches for investment research and company news, synced to Google Calendar alongside bills and reminders.

TECHNICAL SKILLS

AI & Automation

LLMs: Claude, ChatGPT, Codex, Perplexity; Agent frameworks: multi-agent harness design, MCP (Model Context Protocol); Automation platforms: Zapier, n8n; APIs: Guesty, Twilio, OpenAI, Anthropic, REST API integration

Full-Stack Development

Frontend: JavaScript, TypeScript, React, Next.js (App Router); Mobile: Flutter (Dart), Kotlin Multiplatform (KMP) - research/experimental; Backend: Node.js, Express.js; Database: Supabase (PostgreSQL), MySQL; Deployment: Vercel; Version control: Git, GitHub (PR-driven workflow)

Design & Tooling

Figma, Framer; VS Code, Antigravity, Cursor

Business & Operations

Process design and digitization; QA inspection systems; Guest communications systems; Team supervision up to 6 direct/indirect reports; Contractor coordination; Finance data entry; Operational reporting

EDUCATION

IBM Full Stack Software Engineer - Professional Certificate

In Progress | Expected completion: June 2026

Civil Engineering - Texas A&M University of Kingsville

Kingsville, TX | 2019-2020

LANGUAGES

English (native), Spanish (native), Italian (native)
